Movie Review

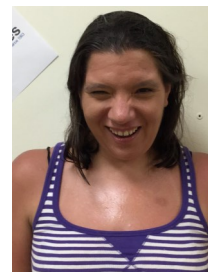

Toy Story 5

Release Date: June 19, 2026

5/5 Stars ★★★★★

Genre: Animation

By Stephanie G.

On Friday June 19, I went to watch the newly released movie “Toy Story 5”. Before watching this movie, I recommend watching the first 4 movies to give you a better understanding of the series but I definitely encourage you to go watch this movie! Here is a little bit of what happened during the movie: Bonnie was invited to sleep overs, but everyone was playing on new iPad devices rather than playing with toys anymore. Bonnie received a brand new iPad for herself and found interest in that instead of her toys. Her dad even recommended throwing her toys away since she didn’t play with them anymore. All the toys got stored in the garage at the time. Woody came back for a visit and decided to help the toys get out of the situation. The toys ended up at someone else's house who eventually became friends with Bonnie where she helped encourage Bonnie to play with toys again, instead of the iPad. I loved every character in this movie, none of them gave me any reason to not like them.
